Hi Chris,

Tolia was able to retrieve the data from some of the stream sites (Leone, Nuuuuli, Fagaalu, and Vaipito). We replaced the logger for Fagaalu with a spare one that we picked up from Jade. We will try and collect the rest of the stream gauges next year when traffic returns to normal. Traffic has made it difficult to travel to other sites. Let me know if you have any questions.

Thanks

Hi Wei,

Thanks so much for these data and the updates. I haven't had much time to process the new datasets into the system, but I will work on it in the near future. (been working through an issue in the baro data, Ill connect about that if I see it again).

Mahalo,
Chris
